Subject: Navy Request for RE 108 Support
Importance: High

Nina / Lora

Hope this email finds you both well.

Following up on our June 4th conversation during that call you suggested activities that you wanted Northrop Grumman to consider supporting associated with the Navy BWD RE108 / Plant 6 hot spot project. Please formalize those suggestions for NG support and submit them in writing to the Navy and Northrop Grumman legal teams participating in the mediation process. For your convenience as well as speeding up the review and discussion process I have included the email addresses for the Northrop Grumman Legal team below.

In line with our existing arrangement your requested Northrop Grumman instruct our contractor to add several new Navy wells to the Navy well sampling program coordinated through NG. I wanted to inform you that those wells have been added to the list of Navy wells sampled by our contractor.

Additionally, Northrop Grumman is available to participate in any working group sessions for developing the RE108 hot spot work plan(s), reviewing data and other information and/or drafting any portions of those plan(s). We can also provide verbal reviews and comments, participate in phone calls, email exchanges or partake in project updates, reviews and status reporting.

Please call or email if you require any additional information or would like to schedule my/our participating in any RE 108 technical reviews.

Thank You

Edward J. Hannon
